

ShoHan Vitamin Nose Blackhead Removal Strip is designed to remove dirt, oil and pores clogging debris from the nose area with the adhesive properties of the moistened / activated strips. It contains 'Vitamin E, aloe and witch hazel' to provide nutrients. The results can be seen instantly as you remove the strip. You will notice that your pores are cleaner and less visible.

HOW TO USE

1. Wash Face / Moisten nose – Wash your face thoroughly with soap, making sure that it is free of any cream, lotion or make up. Thoroughly wet the nose. The strip won't stick on a dry nose.
2. Dry hands and peel the strip off the plastic liner.
3. Apply strip to the moistened nose area with smooth side facing your skin. Smooth side is the side which was facing the plastic liner. Press the strip properly for about 20~30 seconds making sure that there are no air bubbles and ensure that the strip has stuck properly on the nose.
4. Let dry for about 10-15 minutes. The strip should feel stiff as it dries.
5. After the strip has dried, slowly and carefully peel off the strip starting at edges, pulling towards center.

CAUTION

- Use the strip immediately upon opening the individual aluminium foil package.
- Avoid using on areas with pimples, sunburn or excessively dry skin.
- Avoid using on areas sensitive to tapes, bandages or peel off masks.
- If the strip has adhered to your nose too strongly and it pains while removing ; wet the strip thoroughly and carefully peel off.
- Suggested use 1-2 times a week and avoid exceeding 3 times a week.
